Problems

DIFFICULT TO FIND INFO

It is difficult for those looking for internships or full-time jobs that do not require Japanese to find such opportunities.
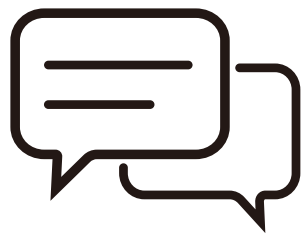

HARD TO FIND PROJECT PARTNERS

As projects become more important to secure internship and full-time job offers, there is no community available for finding project partners.
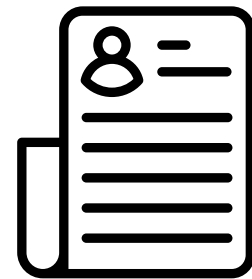

NO CS ALUMNI NETWORK

The Career Development Office has no CS alumni contact details.
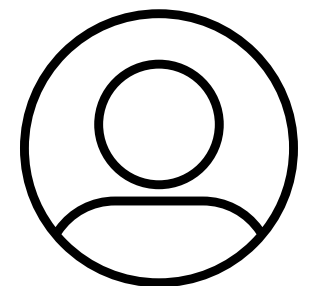

Key App Features

Forum Board

Internship Board

Project Invitation Board

Alumni Contact

Profile

What Makes Our App Unique

TUJ CS NETWORK
You can easily connect with the resources you need.

GLOBAL INTERNSHIPS IN JAPAN
Although there is a lot of information about internships in Japan and the US, you can find many internships that do not require Japanese in one place.

CONNECT WITH ALUMNI
You can connect with CS alumni and ask them questions you may have.

How To Implement

Firebase

REALTIME DATABASE

We store the internship details and forum posts in the realtime database.

SDK AUTHENTICATION
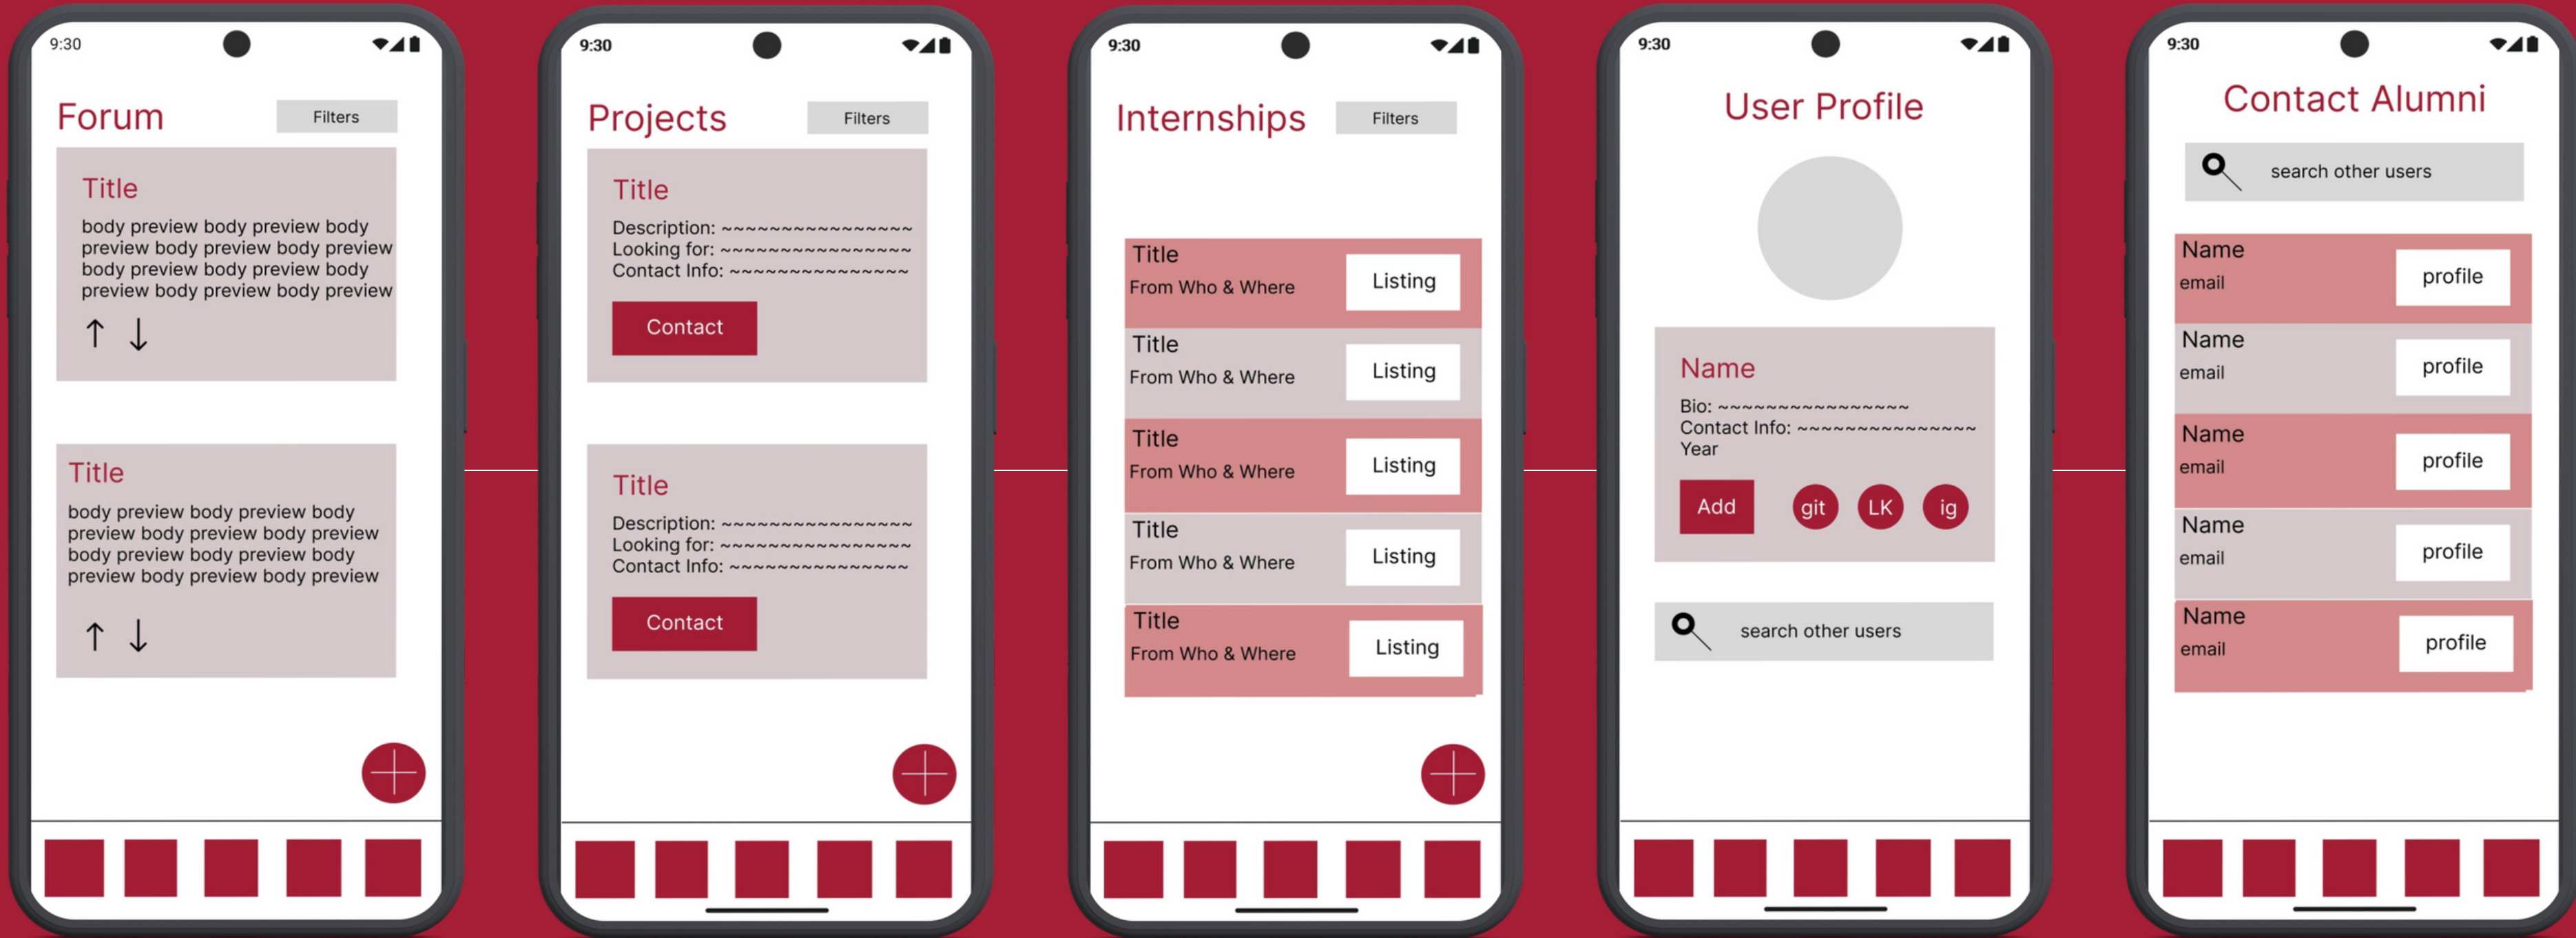

We use it for user authentication and implement UI components for sign-up and login.

CLOUD MESSAGING

We might use it in case that we need to implement the message feature.

Design

Rough sketches of what each page will look like
